

# COLDFUSION 11 UPDATE 3

## ISSUES FIXED

ID	TITLE	Product Area
<a href="#">3728133</a>	Provide status while uninstalling ColdFusion update.	Administrator
<a href="#">3737579</a>	Check for updates' button is not in sync with the notification bulb.	Administrator
<a href="#">3738861</a>	Clicking on "Remove Selected" button in "CF admin > Security > Allowed IP Addresses" gives an error	Administrator
<a href="#">3738871</a>	Updates not displayed correctly in case there are multiple updates available.	Administrator
<a href="#">3741635</a>	Add sentence to "Maximum Number of Cached Queries" description in CF Admin	Administrator
<a href="#">3741641</a>	Archive Wizard step indicators are in the wrong position for PDF services, Archive To Do and Archive summary pages.	Administrator
<a href="#">3746060</a>	Help document showing ColdFusion 10 contents	Administrator
<a href="#">3747483</a>	Clicking on verify button on PDF Services page in the Admin shows the text "YES".	Administrator
<a href="#">3767633</a>	Importing car file from ColdFusion 10 into ColdFusion 11 breaks the installation.	Administrator
<a href="#">3811279</a>	CFExplorer not working for ColdFusion Interfaces.	Administrator
<a href="#">3816133</a>	System Probe not working. HTTP request returned non-200 status code: Connection Failure.	Administrator
<a href="#">3827088</a>	Update DataDirect driver version from 5.1.1 to 5.1.3.	Administrator
<a href="#">3712885</a>	Name parameter of cfgridcolumn not honored with JS binding in grids.	AJAX
<a href="#">3712909</a>	Grid pagination does not work with JS binding.	AJAX
<a href="#">3737272</a>	Remove hard coded references to /CFIDE/scripts	AJAX
<a href="#">3741341</a>	When using the cfgrid tag with groupField attribute set, grouping by a Boolean type column does not display the values for the each group.	AJAX
<a href="#">3741397</a>	Mask attribute of cfgridcolumn not honored.	AJAX
<a href="#">3741675</a>	Clicking on the delete button in a grid deletes the selected row but results in an error.	AJAX
<a href="#">3757675</a>	cfmap requires /CFIDE in scrip-src path	AJAX
<a href="#">3759630</a>	Using a CFGRID with a CFC bind fails for an incorrect JavaScript when more than 2 parameters are passed from a form.	AJAX
<a href="#">3816340</a>	Image missing in the context menu for headers in cfgrid.	AJAX
<a href="#">3741588</a>	ID returned by CacheGetAllIDs function for query objects does not work	Caching

	for cache methods like CacheGet, CacheRemove, CacheGetMetadata, CacheExists etc.	
<a href="#">3846185</a>	cacheRemove(cacheGetAllIds()) throws attribute validation exception	Caching
<a href="#">3846186</a>	cacheRemove()'s exact=false behaves as exact=true if exact ID match is found	Caching
<a href="#">3849494</a>	CacheRemove throws an exception when one or more queries do not have cacheId attribute	Caching
<a href="#">3788135</a>	CFExchangemail: the "toID" attribute in the mails retrieved from a mailbox, displays the primary email address even if the mail was sent to an alias.	CFExchange
<a href="#">3788148</a>	CFExchangemail: The CC, BCC, fromID and toID attributes in a retrieved mail do not display the display names.	CFExchange
<a href="#">3756738</a>	cfchart style value does not work in ColdFusion 11	Charting/Graphing
<a href="#">3756754</a>	cfchart shows legend even when disabled by showlegend="false"	Charting/Graphing
<a href="#">3756789</a>	CFChart uses space and border for empty title	Charting/Graphing
<a href="#">3798825</a>	CHCHARTSERIES Pie Chart Attribute "datalabelstyle" Has No Effect	Charting/Graphing
<a href="#">3800311</a>	CFCHARTSERIES Data Attribute Will Not Produce Pie Chart According to Documentation	Charting/Graphing
<a href="#">3812163</a>	Passing json file name as style attribute does not show the chart	Charting/Graphing
<a href="#">3816026</a>	showLegend property does not override the property defined in style file	Charting/Graphing
<a href="#">3849389</a>	Issues with pie chart when datalabelstyle is set to columnlabel or pattern.	Charting/Graphing
<a href="#">3849267</a>	showLegend=true does not show legend on chart.	Charting/Graphing
<a href="#">3824411</a>	Cannot override show3D value given in xml with tag-attribute value. The value given in xml style always takes precedence.	Charting/Graphing
<a href="#">3430245</a>	Session gets lost on cflocation with J2EE Sessions and Cookies disabled	Core Runtime
<a href="#">3753710</a>	String member functions break existing code that relies on java.lang.String member functions	Core Runtime
<a href="#">3800047</a>	setEncoding breaks cffile action="uploadall" with some empty file fields	Core Runtime
<a href="#">3486968</a>	Add Support for DB2 10 on Linux and Windows	Database
<a href="#">3740190</a>	queryAddColumn() casts to bit when preceded by bit column and QoQ had a prefixed ORDER BY	Database
<a href="#">3765663</a>	QueryExecute ignores scale property in param struct with cfsqltype of 'cf_sql_decimal'	Database

<a href="#">3779331</a>	Error when using Query of Query and SQL statements ending in semicolon	Database
<a href="#">3780222</a>	Upgrade PostgreSQL JDBC driver	Database
<a href="#">3808734</a>	Enable dbvarname by default	Database
<a href="#">3738230</a>	Using top=x does not the Filtered label for arrays.	Debugging
<a href="#">3760258</a>	Images missing in debug output	Debugging
<a href="#">3811006</a>	cftrace/trace reports incorrect line number	Debugging
<a href="#">3854765</a>	cfdump for an empty array displays empty twice	Debugging
<a href="#">3333862</a>	cfdocument/cfpdf scale="100" shrinks content	Document Management
<a href="#">3567818</a>	Spreadsheetwrite: autosize does not work to re-size columns with datetime values.	Document Management
<a href="#">3734792</a>	PDFs created by cfhtmltopdf are not accessible/tagged	Document Management
<a href="#">3744503</a>	cfhtmltopdfitem doesn't support additional attributes	Document Management
<a href="#">3744504</a>	Naming inconsistency of page number variables – pagenumber and lastpagenumber	Document Management
<a href="#">3758430</a>	cfhtmltopdfitem units of margin attributes	Document Management
<a href="#">3800030</a>	Spreadsheetaddsplitpane does not work when a spreadsheet object is added to an existing file using action = update.	Document Management
<a href="#">3795400</a>	<cfzip action="unzip" ... storepath="no"> does not work as expected.	File Management
<a href="#">3724983</a>	Error in cftextarea and cfselect when setting a value using cfset and adding +1 to it.	General Server
<a href="#">3783403</a>	ExpandPath returns Incorrect path when used with Mappings in Application.cfc	General Server
<a href="#">3845475</a>	Grammar error in error message when using the queryGetRow function	General Server
<a href="#">3345396</a>	Updates already applied from console should be restricted from ColdFusion Administrator	Hot Fix Installer
<a href="#">3743165</a>	ColdFusion update checks repeatedly for the status if ColdFusion is configured with an external webserver.	Hot Fix Installer
<a href="#">3743254</a>	After submitting Update URL site, 'Download' and 'Download and Install' buttons do not work.	Hot Fix Installer
<a href="#">3743255</a>	In WebLogic, Dialog box that pops up after downloading the hotfix does not show any buttons.	Hot Fix Installer
<a href="#">3760334</a>	Mouse hover to Install button shows text "Download and install"	Hot Fix Installer
<a href="#">3772199</a>	Remove "max_reuse_connections=250" line from workers.properties file from non-IIS configurations.	Installation/Config
<a href="#">3781603</a>	ColdFusion does not start automatically on uBuntu even if the option to start on system init is selected	Installation/Config

<a href="#">3816729</a>	ColdFusion administrator does not load images due to a conflict in web.config	Installation/Config
<a href="#">3734319</a>	CFIMAP action GETALL breaks when there is an email attachment with square brackets	Java Integration
<a href="#">3041747</a>	Errors raised in onApplicationEnd and onSessionEnd do not show up in the Application log files	Language
<a href="#">3043855</a>	PATCH should be supported for the CFHTTP tag	Language
<a href="#">3489021</a>	Add includeEmptyFields parameter to ReplaceList (as per ListToArray and others)	Language
<a href="#">3748332</a>	CFClient does not support arrayEach() / arrayFilter() / arraySort() / arrayMap() / arrayReduce()	Language
<a href="#">3750734</a>	List iteration & member functions all need to expect both a "delimiters" and an "includeEmptyValues" argument.	Language
<a href="#">3752316</a>	Support ListChangeDelims() member function	Language
<a href="#">3754589</a>	strictNumberValidation setting not reflected in client side CFFORM validation	Language
<a href="#">3754672</a>	Prefix-based custom tags work only if cfimport is used outside of cfsript.	Language
<a href="#">3760802</a>	CFLocation tag when used in default constructor of Application.cfc throws error	Language
<a href="#">3777301</a>	FileUploadAll function does not work with HTML5 <input> multiple attribute	Language
<a href="#">3777403</a>	CFLOOP with simple time values no longer works	Language
<a href="#">3780136</a>	cfimport in cfsript does not work as documented	Language
<a href="#">3783011</a>	Query of Queries giving the wrong result	Language
<a href="#">3818770</a>	Elvis operator executes RHS (right hand side) when it doesn't need to.	Language
<a href="#">3820906</a>	Add ListRemoveDuplicates for list objects	Language
<a href="#">3845642</a>	Passing a CFC object with string property value as "yes" or "no" to serializeJSON function converts the values to true or false	Language
<a href="#">3845963</a>	listEach: arguments scope in UDF function (passed to listEach) should contain the information of delimiter and includeEmptyFields	Language
<a href="#">3851922</a>	Elvis operator does not maintain case sensitivity	Language
<a href="#">3842370</a>	Error including file when it is referenced using a ColdFusion mapping pointing to an IIS virtual directory	Language
<a href="#">3820493</a>	CFLOOP on large query record set with more than 65534 records only processes first 65534 records in query	Language
<a href="#">3335509</a>	Audit log file should log updater installs/uninstalls	Logging

<a href="#">3617930</a>	Included CSS file using link tag is not included in packaged mobile code	Mobile Support
<a href="#">3734606</a>	ReadAsBase64 function in cfclient errors when reading in a URL that starts with content://	Mobile Support
<a href="#">3737516</a>	REFind gives error when regex containing certain group combination is passed as a pattern	Mobile Support
<a href="#">3738100</a>	Incorrect result when using duplicate function to operate on a nested structure	Mobile Support
<a href="#">3739334</a>	structCount shows unexpected output when keys are "b.d" and "b.c"	Mobile Support
<a href="#">3739782</a>	StructSort doesn't work as expected when sorting is done on nested struct keys	Mobile Support
<a href="#">3742204</a>	cfinclude within <cfclient> should support .html file inclusion	Mobile Support
<a href="#">3754684</a>	Add failure callback handler for invokeCFClientFunction function	Mobile Support
<a href="#">3786749</a>	Upgrade Apache Cordova library to v3.5.0	Mobile Support
<a href="#">3804384</a>	QueryExecute params not working in mobile	Mobile Support
<a href="#">3828377</a>	QueryExecute named params if given as camel casing throw an exception.	Mobile Support
<a href="#">3833529</a>	Using index variable inside anonymous function called as a parameter to ArrayEach(Member functions) gives undefined index	Mobile Support
<a href="#">3744211</a>	CFHTTP fails to redirect with POST, PUT, DELETE, or OPTIONS methods	Net Protocols
<a href="#">3763348</a>	CFHTTP not working with some web servers like maps.googleapis.com and it throws a 404 error.	Net Protocols
<a href="#">3796626</a>	CFFTP LISTDIR Command Fails against FTP servers that do not allow the SYST command	Net Protocols
<a href="#">3835743</a>	ORM: Exception while de-serializing persistent object	ORM Support
<a href="#">3760466</a>	PDF output truncated by ColdFusion/IIS when passing URL parameters	Platform Support
<a href="#">3514766</a>	Problem adding Scheduled Task on system with different format and display settings that runs on Java 7	Scheduler
<a href="#">3787631</a>	Axis2 web services can cache unexpectedly.	Web Services
<a href="#">3790251</a>	Unable to connect to web socket over SSL	Web Socket
