

# Bugs fixed in ColdFusion 11 Update 11

Bug ID	Title	Product area
3810459	In ColdFusion Administrator, there is an error message when you change a setting or verify DSNs.	Administrator
3948798	When adding additional users to ColdFusion Administrator (with full admin access), you encounter an error message when trying to access the Settings Summary page.	Administrator
4071326	When editing system probes for the first time, you see an error message when the probe runs.	Administrator
4103616	In ColdFusion Administrator, you are unable to select multiple messages.	Administrator
4106021	ColdFusion Administrator still mentions iprestriction.properties.	Administrator
4114686	The Updates page in ColdFusion Administrator throws an exception when session variables are disabled.	Administrator
4115249	After changing the Metrics Frequency to a value other than 60 and restarting ColdFusion Administrator, the value of Metrics Frequency reverts to 60.	Administrator
4116141	The Secure Profile page should have the label <b>Allow</b> instead of <b>Disable</b> for the allowed SQL settings.	Administrator
4116747	When setting the client variable purge time to more than 596 hours, the server interprets that as zero hours.	Administrator
4126408	After disabling application variables and restarting ColdFusion Administrator, there is an error message.	Administrator
4141881	Mail server connection verification fails.	Administrator
4164357	Error invoking CFC /CFIDE/administrator/mail/undeliveredmail.cfc.	Administrator
3037144	An empty input in cfinput causes cflayoutarea to duplicate itself.	AJAX
3853569	CFContent tag works differently in ColdFusion 11.	AJAX
3914318	ColdFusion.Layout functions fail from ajaxOnLoad().	AJAX
3967336	/CFIDE/scripts/ incorrect path in reference.	AJAX

4003807	ColdFusion.Window.Create results in missing vertical scrollbars.	AJAX
4078000	cfwindow headerstyle does not work.	AJAX
3369530	Frequent key collisions on cached queries results in incorrect (cached) result-set.	Caching
3946143	Cache already exists error.	Caching
4074050	When internal memory is used, caching fails after certain limit of number of cached objects is reached.	Caching
4131909	Clear Query Cache works incorrectly.	Caching
3963559	this.timeout in Application.cfc does not properly set the request timeout.	CFComponent
4055832	Integer and Float validation passes input commas.	CFForm
4170204	'serverSideFormValidation = false' stops validation errors, but does not stop omission of fieldnames.	CFForm
4176858	ColdFusion incorrectly inserts scripts above the DOCTYPE tag.	CFForm
4188119	When a <cform> tag is used, it places a number of <InvalidTag> and <link> tags immediately after the <head> tag in the displayed HTML page.	CFForm
4077066	imageMakeColorTransparent() does not accept "r,g,b".	CFIMAGE
4077069	imageMakeColorTransparent() does not accept an array of "r,g,b".	CFIMAGE
4095231	Null Pointer Exception occurs shortly after application start when using cfimage action=captcha.	CFIMAGE
4096238	imageGetIPTCMetadata() does not return metadata.	CFIMAGE
4102192	CFIMAGE throws an exception when filenames/source contains space.	CFIMAGE
4136756	CFCHART within custom tag within function causes null pointer exception.	Charting/Graphing
4176625	All webpages including admin screen throw monitoring service error.	ColdFusion Services
3780066	Specifying the server="" attribute within cfoject crashes and restarts the ColdFusion server x64 (server="remote" is not working with 64-bit ColdFusion).	COM/DCOM

4099820	WeakHashMap in coldfusion.runtime.java.ReflectionCache.java in cfusion.jar is not thread safe and can cause infinite loops.	Core Runtime
4163793	Missing Template not being honoured on WildFly 8.	Core Runtime
4173657	setDomainCookies causes NullPointerException on domain change.	Core Runtime
3998005	CFQuery's recordCount is not always accurate for SQL Server datasources.	Database
4121934	Incorrect casting and casing in Query of Queries.	Database
4110576	CFDUMP and writeDump() fails when hiding struct elements via "hide" attribute/argument.	Debugging
4195386	Coldfusion builder debugger works unexpectedly after applying ColdFusion (2016 release) update 3.	Debugging
3846442	There is inconsistency in naming of page number variables in cfdocumentitem.	Document Management
3931678	<cfhtmltopdfitem evalatprint="true false"> throws an exception under some circumstances.	Document Management
3963656	spreadsheetWrite autosizes only on the active sheet.	Document Management
4042548	Need support for protecting a sheet of .xlsx files.	Document Management
4051606	Need appropriate error message when passing wrong data to spreadsheet.addRow().	Document Management
4060761	<cfhtmltopdf> generates metadata title as temp file path.	Document Management
4075206	There are timeout issues with CFHTMLTOPDF.	Document Management
4088687	<img src=""> throws cfdocument timeout.	Document Management
4120116	Thread attribute variables unusable in cfhtmltopdf/cfdocumentheader/footer.	Document Management
4125142	CFHTMLTOPDF fails when more than one attribute sent in URL eg ".....cfm?job=12345&sys=P".	Document Management
4139060	SpreadsheetAddRow applies unfamiliar time format to time values added to a spreadsheet.	Document Management

4142993	cfhtmltopdf fails to write if filename contains special characters.	Document Management
4152515	cfspreadsheet throws Array Index Out Of Bounds Exception if quoted CSV value does not contain comma.	Document Management
4165319	cfspreadsheet on read alters cell data by auto-trimming the data.	Document Management
4168921	CFPDF read/getInfo does not show custom properties properly.	Document Management
3925916	cfspreadsheet tag is unable to write to the Virtual File System by using "ram://".	File Management
4108519	Trying to load an ORM enabled entity with relations into a flex client results in error.	Flex/Flash
4134089	Messaging does not work after applying Update 17.	Flex/Flash
4036452	In some cases, URLDecode() removes certain characters.	General Server
4097008	CGI.HTTP_URL returns [empty string] on IIS when default doc is omitted.	Installation/Config
4110224	Using datasource.cfc (in the admin api) to create a data source throws an error message.	Installation/Config
3774074	Mixed-in functions cannot access SUPER "scope" on first call to a function.	Language
3954490	Error handling implicit array in combination with ternaryoperator in <cfloop array="...">.	Language
4021994	ColdFusion masks correct exception when exception is thrown from within an iteration method using a function expression.	Language
4031746	In ColdFusion 10, ARGUMENTS scope takes the precedence over the LOCAL scope.	Language
4043038	Cookies assigned with a NULL value are not recognized.	Language
4064602	getSafeHtml() input string length is limited to 5000 chars.	Language
4104246	isObject(image), isObject(spreadsheet), and isObject(file) return YES.	Language
4113069	DateTimeFormat does not honor escape characters.	Language
4117325	duplicate(query) breaks query.getResult().	Language
4118895	attributecollection is broken for all tags inside a loop.	Language

4119653	Setting non-scoped variable in a udf in ColdFusion (2016 release) behaves differently from ColdFusion 11.	Language
4129246	ParseDateTime() ignores DST and converts time to standard time.	Language
4129321	Array member functions broken for results of getMetaData(this).	Language
4164200	replaceList/replaceListNoCase delimiters work unexpectedly in case of a subset of a regex.	Language
4167883	Introduce queryGetResult() function for the corresponding member function, query.getResult().	Language
4168114	cfscript cfmodule runs start tag / end tag when no {} after it.	Language
4179264	isPDFObject returns varied results depending on whether the PDF was read from a file or generated in memory.	Language
4137968	Using more than one <cfclient></cfclient> block does not work.	Mobile Support
3935795	cfhttp fails to honor http.nonProxyHosts system property.	Net Protocols
3988461	CFHTTP strips out certain file properties on .docx files.	Net Protocols
4016861	cfpop fails to receive embedded email attachments forwarded from Apple Mail iOS clients.	Net Protocols
4090508	cfhttp concatenates query strings w/ ?.	Net Protocols
4126653	Error message "javax.mail.MessagingException: Unable to load BODYSTRUCTURE" when using CFIMAP.	Net Protocols
4149198	Body ignored in HTTP PUT/PATCH (and DELETE).	Net Protocols
4152543	cfhttp throws "Incorrect number of columns in row" if quoted CSV value contains newline.	Net Protocols
4166939	cfmail - attachments do not appear in Apple IOS Mail App when cfmailparam has both inline and attachment content.	Net Protocols
4172645	Using hyphens in cfftp connection name causes unexpected results.	Net Protocols
4173670	deserializeJSON() invokes java.lang.System.getProperty(), which is slow with sandbox security enabled.	Performance
3194042	Inconsistent use of underscores in cfschedule's result fields and attribute values.	Scheduler
4160212	Coldfusion 11 contains an outdated version of Antisamy library.	Security

<a href="#">4160218</a>	GetSafeHTML crashes on invalid XML (antisamy, nekohtml).	Security
<a href="#">4136028</a>	serializeJSON() does not escape control characters.	Serialization
<a href="#">4158658</a>	Deserialization of WDDX'd timestamp query columns does not work in ColdFusion 11 and above.	Serialization
<a href="#">4158660</a>	Incorrect deserialization of WDDX'd bit column.	Serialization
<a href="#">3785874</a>	CategoryTree does not work in ColdFusion 10.	Text Search
<a href="#">4076735</a>	cfsearch with contextpassages throws a null pointer error when a large number of results are returned.	Text Search
<a href="#">4165678</a>	Sequential cfindex operations may report a wrong status.	Text Search
<a href="#">4185061</a>	cfsearch type is case-sensitive.	Text Search
<a href="#">4053567</a>	The expandPath function returns ColdFusion bin directory.	Web Container (Tomcat)
<a href="#">3919057</a>	XML Webservices does not work in ColdFusion 10.	Web Services
<a href="#">4154216</a>	Websocket frame size error in Google Chrome and IE.	Web Socket
<a href="#">4181270</a>	Websocket proxy in an infinite loop.	Web Socket
